If your school has given you an online account with Google or Microsoft use these buttons.

Tip: Set up a new gmail account for the class to use

Using the new Gmail address you have set up. Get the class to enter the email with a + sign and then each child inserting their own nickname here. E.g.

knowsleyclcs+ @gmail.com

This tricks the app into thinking each child has their own email address.

Choose a user name, not your real one

Add the email your teacher gave you

Create a secure password. It must have numbers and capital letters. Do not share this with others.
